

Glass wool

Our core material

Good sound absorption

- Highest absorption

Strong and flexible

- Possible to install big or long sizes and at the same time keep weight low

Easy to cut

- Makes the installation quicker and better

Environmental friendly

- 70% is recycled glass

High moisture resistance

- 95%/30°C
- Allows you to install the ceiling before ventilation or air condition are in service
- Doesn't sag or warp

Easy to handle

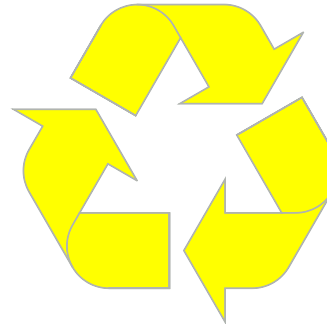

- Saves the installers back and makes the transport more efficient

Environment

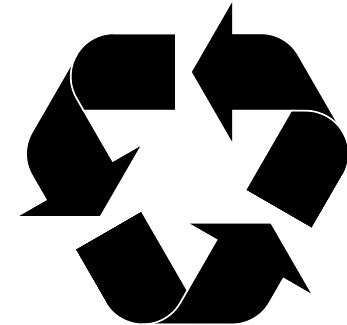

Nordic Swan

The products fulfil the Nordic environmental demands during the total life time - from production to re-usage.

Glass recycling

70% of the core material in Ecophon products contains recycled glass containers.

REPA

Ecophon is a member of REPA, who administrates the recycling of packing material from sites.

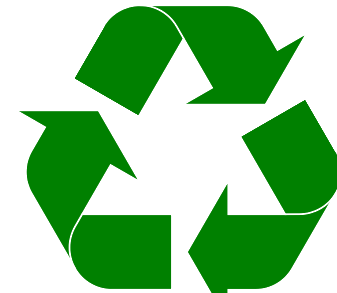

Dansk Indeklima Maerking

The products fulfil the best class, 10 days, regarding degassing single substances to drop below threshold levels.

Asthma och Allergi Förbundet

The Asthma and Allergic Association recommends Ecophon ceilings. The goal for the association is to minimise the health hazards in the indoor environment.

Recycling

The oxymelt process, is a melting process that recycles old products.
